SUMMARY

I'm an MCA student who enjoys building strong and scalable backend systems. I like writing clean, easy-to-understand code that helps solve real problems, and I'm always curious to learn how things work behind the scenes. Whether it's a project, learning about devops and fullstack. I give it my full focus and energy. I'm excited to carry this mindset forward as I grow in the tech field.

SKILLS

- Programming: Java, SQL
- Frontend: JavaScript, React.js
- Backend: Node.js, Express.js
- Databases: MySQL, MongoDB
- Cloud & DevOps: AWS (EC2, S3, RDS, Load Balancer, Autoscaling), Docker, Kubernetes
- Concepts & Tools: REST APIs, OOPS, Git/GitHub

PROJECTS

Trendy Stock Predictor | GITHUB LINK

- Built a cloud-ready, full-stack system to surface intraday stock candidates using rule-based numeric filtering, AI-assisted news sentiment analysis, and event-driven refresh cycles.
- Developed versioned RESTful APIs using Node.js & Express, integrating NSE market feeds and multi-source news ingestion pipelines, with Redis-based read-through caching and in-memory fallback to achieve low-latency, high-throughput responses.
- Designed a resilient, loosely-coupled microservices architecture with a separate Python FastAPI AI service, implementing feature flags, request timeouts, circuit-breaker-style fallbacks (VADER), health probes, and service-level metrics.
- Containerized and orchestrated frontend, backend, and AI services using Docker and docker-compose, publishing versioned images to Docker Hub, enabling environment parity, repeatable deployments, and horizontal scalability readiness.

Placify | GITHUB LINK | HOSTED LINK

- Full-stack campus placement system using MERN stack & AWS to help students share and browse real interview experiences.
- Built a cloud-native placement management platform enabling students to share and explore real interview experiences using a scalable AWS-based architecture.
- Developed RESTful backend APIs with Node.js and Express, deployed on EC2, and integrated Amazon RDS (MySQL) for structured data storage.
- Implemented managed authentication using Amazon Cognito and secure file storage using Amazon S3, reducing security and operational overhead.

EDUCATION

Master of Computer Applications (MCA) — Ongoing

- RV College of Engineering, Bengaluru (Affiliated to VTU) — 8.5 CGPA (3rd Semester)

Bachelor of Computer Applications (BCA) — Nov 2021 - Sep 2024

- Smt. Kumudben Darbar College of BCA, Bijapur (Affiliated to RCUB) — 8.9 CGPA

CERTIFICATES

- Java for Beginners – Infosys Springboard | CERTIFICATE 1 week course
- Research Methodology, NPTEL (MOE, Govt. of India) | CERTIFICATE 4 weeks course 2025
- AWS Fundamentals from Udemy | CERTIFICATE Mar- April 2025
